

`contextlib.suppress`

`contextlib.ContextDecorator`

`_distutils_hack.suppress`

```
graph BT; A["_distutils_hack.suppress"] --> B["contextlib.suppress"]; A --> C["contextlib.ContextDecorator"];
```

The diagram illustrates the relationship between three Python code elements. At the bottom is a box containing `_distutils_hack.suppress`. Two arrows originate from the top of this box: one points to the `contextlib.suppress` box on the top left, and the other points to the `contextlib.ContextDecorator` box on the top right. This indicates that `_distutils_hack.suppress` inherits from or is a subclass of both `contextlib.suppress` and `contextlib.ContextDecorator`.
